

Altimetrik Interview questions(round 1)

Terraform Questions

1. What commands have you used in Terraform?
2. How to rectify tainted resources
3. What are dependency logs in terraform?
4. What is data source and how it is useful?
5. Suppose I have created a resource through terraform and did some manual changes. Next time when I run apply the resource should not be updated what you will do?
6. What is root module and child module in terraform?

AWS Questions

1. Suppose I have an instance and I am trying to connect to it but I am getting error what might be the reason?
2. I am getting error device name invalid when I am trying to connect to ec2 what might be the reason?
3. Have you used AWS RDS? Then what is the difference between read replicas and multi-AZ?
4. In Multi-AZ do the user request go to both primary and replicas?
5. Explain S3 lifecycle management?
6. What is a C record in route 53?
7. How do you bind SSL certificate in ALB?
8. What is Access key rotation?
9. Suppose I create resources in account A and I want to provide access to resources in account B. How do you do that?
10. What are log groups in cloudwatch?
11. Suppose some user has corrupted an ec2 instance how will you find out?

Docker Questions

1. How do you build docker image from docker file?
2. How do you build docker image from container?
3. Difference between docker load and import?

Kubernetes Questions

1. What are probes and how many have you used?
2. Suppose I have updated my ConfigMap manifest file and without restarting or stopping the pod I want the changes to be accessed by Pod. How do you do that?
3. What is Daemon set and its use case?

Linux Questions

1. How do you check whether remote server port is open?
2. I want to change IP address of the linux server. How to do that?
3. I want to change domain name or add domain name in the server. In which file you add?

[05/08, 6:24 pm] sumeet kulkarni93: Cognizant -questions

1. Introduce yourself
2. CI/CD write and explain
3. Have you written the POM.xml
4. difference with copy and add and CMD
5. Branching strategy
6. Write a script to install EC2 by terraform
7. If you make any changes to the statefile and apply but then if you want to go back to the previous version of it how do we achieve it
8. In jenkins if you want to install the previous version of plugin how do you install it
9. Difference services you have worked in AWS
10. Explain How to integrate ALB
11. Difference between count and each
12. Difference between git pull and git fetch
13. What are some technical and business benefits of devops work culture

[05/08, 6:24 pm] sumeet kulkarni93: Tech Mahindra -Questions:

1. Could watch what and all u worked on, what is cloudwatch insight.
2. Where you used cloudwatch in ur project and if you want to monitor and set cpu usage of 100 server to 80% and restrict user login to max 20 user, how u setup cloud watch for this, I need to set to monitor this for next 20days.explain each step
3. write a jenkins pipeline which contains all your stages and one stage should run ansible playbook.
4. explain k8s architecture, what is kubectl, what exactly it will do.
5. What type of autoscaling available in aws.
6. What is Route 53 and how it will work
7. Explain about your current project, what all aws services u used in it.

[05/08, 6:24 pm] sumeet kulkarni93: Company- Coforge

what is the chance of recovering state file if I am not managing the backup of statefile?

What is the use of gather facts in ansible.

If there is 4 web servers on AWS, I need to write an ansible playbook to check whether the http server is running or not on target host machine.

Can I copy a file from host machine to target host machine? write the playbook

what are all modules you have used in ansible you used.

in K8s what is the difference between service and ingress?

If I don't have ingress then can I still expose my pods to outside world?

what is the use of daemon set?

I have k8s 3 nodes in cluster and as three replicas, in node one and two pod is good, in node 3 I am seeing status as container is still creating how do I troubleshoot this

what is the use of Docker entrypoint

How helm chart is used in k8s deployment.

Difference between AWS snapshot and AMI

Have you ever created security group

What are the difference type of load balances you have used?

difference between git pull and git fetch

What is the use of CloudFront

What type of errors u see when u fix something. In Jenkins

I am new to CI/CD pipeline, how do you guide me to create one.

what Jenkins plugin you will use for CI/CD? to use the pipeline is there any plugin required?

[05/08, 6:24 pm] sumeet kulkarni93: mindtree:

partitioning in linux

if there are multiple master nodes how do you know which one is master node

one of the nodes is not ready.. how do you rectify it?

infra migration from one region to another..

how do you manually schedule a task in crontab?

commands to list ns, pods, nodes,

how to run commands inside pod?

how do you list charts?

if the deployment is failed how do you go about it?

kubernetes jobs

what is your day to day responsibilities?

[05/08, 6:24 pm] sumeet kulkarni93: Capgemini Interview questions

1. What is Devops and why do we need it?
2. Before devops how was the software development?
3. Explain the stages in devops life cycle.
4. Give a brief of the Jenkins pipeline you used and what style it was written

5. What plugins you used
 6. For integrating kubernetes with Jenkins what plugin you used?
 7. What terraform commands you are familiar with?
 8. What kind of resources have you provisioned through terraform?
 9. Why did you choose terraform over cloudformation?
 10. I have a scenario where I want to use the environment variable present on a server which was created manually inside the terraform configuration file. How do you achieve this?
 11. What shell scripts have you written and explain any one in detail?
 12. Did you manually run your shell scripts?
 13. As you said that you have written multistage dockerfile explain what you wrote?
 14. What is the use of writing multi stage dockerfile and can we use two From images inside a docker file?
 15. What do you mean by hardening the docker image?
 16. What is the use of Kubernetes? You can use only Docker container to deploy your applications right
 17. Explain ingress controller and how you specify the routes?
 18. Explain how you host your web application? Tell me overall steps involved
- [05/08, 6:24 pm] sumeet kulkarni93: Company: DanskeIT

Let me know role and responsibilities in your current project and tech stack used in your current project

What is the advantage terraform offers over ansible

Can I use ansible for the provisioning

Difference between IAAS, PAAS and SAAS

I have data sitting on-prem and application in aws. Is it saas, paas or iaas?

What is difference between docker and kubernetes?

Can we deploy applications in docker?

Do docker have the concept of POD?

I have scenario already have an image1 and I want to create another image2

Image2 uses all the resources of image1 with other resources.

Image2 uses partially resources of image1.

I need to check the code coverage. what you will do?

Do you deploy sonar qube on any of the containers?

How to make all the containers talk to each other in docker?

What we will have in container so that they communicate with each other?

Replicate the same scenario in kubernetes the above scenario?

How communication happen between frontend and API?

In docker I have docker image and what variables we can use in docker file?

What is the purpose of args in docker?

What is the difference between COPY and ADD command?

Is there any other advantage with COPY and ADD?

Will COPY work with remote locations?

What is the template in terraform?

What happens when you apply Terraform Plan?

What is the use of backup tfstate?

What is the importance of Null Resource and why do we need?

We have ingress rule and multiple environments. What if I have to define ingress rule for these multiple environments with a single security group? How will you handle this scenario.

There is a service called IAM in aws. What is difference between IAM and KMS?

What is the use of CDN?

Have you used any Database service in your experience?

What if you want to use NoSQL in aws?

I already have an infrastructure with 10 jobs running. All of sudden they stop working with out of memory issues. What will be the reason. How do you debug?

[05/08, 6:24 pm] sumeet kulkarni93: Concentrix date: 29-03-2023

1. Brief your experience in AWS, Kubernetes and Jenkins.
2. Uses of helm in Kubernetes.
3. Can you define helm as monolithic or micro management service, as I could say it is monolithic since we deploy all the services in helm.
4. How do you install particular (object) service in k8 using helm package.
5. Why Kubernetes is called microservice architecture.
6. How would you deploy your application with help of helm.
7. Do you have knowledge on types of cluster and in which you have experienced and explain with respect to your project.
8. How did you manage your eks cluster.
9. Explain about service account and service, difference b/w them.
10. How did you integrate your k8 with Jenkins.
11. How did you configure your worker node goes down in Jenkins.
12. How would you deploy to particular environment in your project.
13. How did you take your Jenkins backup.
14. Explain the concept of Hosted zones.
15. How would you resolve your domain name xyz.com with help of route 53.

16. How did you intergrate loadbalncer with route 53 and uses of load balancer.
17. Different types of Loadbalacncer.
18. Expain the types of Records used in route 53.
19. Explian the Lifecycle of S3.
20. Explian terraform statefile and how did you managed your terraform state file.
21. Explain the process of using the terrafom previous version of state file and how will you ensure that previous version has been used.
22. Explain jenkins pipeline.
23. Explain GIT architecture

[05/08, 6:24 pm] sumeet kulkarni93: company : Persistent Sys date: 25-03-20223

1. Introduce yourself
2. What are the services you were using in AWS?
3. EC2 purchasing options
4. Working on any insatnce, suddenly out of reach what will bw your action plan.
5. Difference between NACL and security group?
6. Components of VPC?
7. Suppose you need create 2 private and 2 public subnets, but you have created 1 public subnet and 3 private subnets, how will convert one private subnet to public subnet?
8. Explain s3 life cycle?
9. data is present in the private subnet and how will you access the private subnet data?
10. Experience in AWS Lamada?
11. Experience in Cloudwatch?
12. Experience in GIT?
13. Git basic like if change any file how will i commit the change the file.
14. Difference b/w git stash and git squash?
15. Difference b/w CMD and Entry-Point.
16. Explain about kubernetes Auto-scaling?
17. Write any ansibele playbook?
18. Write any Docker file?
19. Write jenkins pipeline script?
20. Explain how you can install httpd in 100 serveres?
21. How you will check previous command is succesfull or not in linux?
22. Why did you worked for 5 years in same company?
23. Can you explain Python scripting?

24. Can you able to adjust to the python script in 1 month?

[05/08, 6:24 pm] sumeet kulkarni93: Company: Smc2

Introduce yourself

Replace the word sudha with devops in sudha.txt file. Find the occurrence of sudha word in the file.

There is a directory with n number of files. Delete file older than 27 days

Have you worked on Containerisation?

What type of project have you worked on is it a Javabased or .Net based?

Need to deploy Java based application inside POD and for that you have use any base image and the java image as the custom based image. How will you deploy?

Please write a docker file?

During deployment you will pull the image from ECR what will you mention in Manifest?

Please write a Pod Manifest for the same?

What if the POD is not running fine. What is the reason it went to CrashLoopBack?

What deployment strategy have you used in your project what other strategy do you know?

What is namespace? What is the use of namespace?

Container running inside the pod. During deployment you have copied some properties file related to the application. You found some files are missing and the issue is with properties file. How will check all the

properties file?

In aws what services have you used?

How will you secure S3 bucket?

What is the term PTR in Route53?

What is the difference between domain and hosted zone?

Where have you kept your statefile in your project?

You have to create 4 ec2 instances in london region? Execute the Terraform commands.

At which stage statefile is created?

Do you have knowledge on Ansible? Can you do provisioning in Ansible

Can you write a jenkins pipeline? What stages have you created in your project

What is the difference between continuous deployment and delivery?

We are decommissioning your jenkins master today I will provide the server name and from tomorrow you can migrate. How will you do the migration?

How the old jenkins server and new jenkins server talk to each other?

How to check if the DB is able to communicate to your backend? How do you troubleshoot?

When you will hit the url it will show Internal Server error? How will you troubleshoot?

How to check if DB connectivity is there or not?

What monitoring tools are you using in your project?

I am running 4 pods I want to check the memory that is assigned is free or not?

[05/08, 6:24 pm] sumeet kulkarni93: Company: MSys

Can you explain your day to day deliverables

Come up with cloud infrastructure architecture

What is sticky bits

how do you add a user to sudo privilege

What do you mean by daemon in linux

System should know which partition it should mount and which one it should not

What scripts have you written ?

What do you mean by labels and annotations?

What do you mean by Ingress?

what is hpa in k8s?

What are the different ways you can use secrets inside a pod?

What do you mean by DaemonSet in k8s?

What is the functionality of init container? Please give a scenario or usecase?

What is readiness and liveness probe?

What is operator in K8s?

What is the difference between s3, EBS and EFS?

If I want to install DB in ec2 which storage service I will be using?

How do you block the IP address in AWS? Which service help you to achieve this?

How many VPC can be created and how many VPC peering can be created?

How to check VPC logs?

[05/08, 6:24 pm] sumeet kulkarni93: mindtree:

partitioning in linux

if there are multiple master nodes how do you know which one is master node

one of the nodes is not ready.. how do you rectify it?

infra migration from one region to another..

how do you manually schedule a task in crontab?

commands to list ns, pods, nodes,

how to run commands inside pod?

how do you list charts?

if the deployment is failed how do you go about it?

How many VPC can be created and how many VPC peering can be created?

How to check VPC logs?

Common ports used in devops -

22: Remote access

80: Web traffic

443: Secure web

8080: Jenkins UI

6443: Kubernetes API

9090: Prometheus metrics

3000: Grafana

21: file transfer

9200: Elasticsearch search

5601: Kibana logs

3306: MySQL database

5432: PostgreSQL database

2375: Docker engine

6379: Redis cache 8200: Vault secrets

27017: MongoDB database

8081: Nexus repository

5044: Logstash input

10250: Kubelet management

2379: Etcd storage
